PRODUCT OVERVIEW

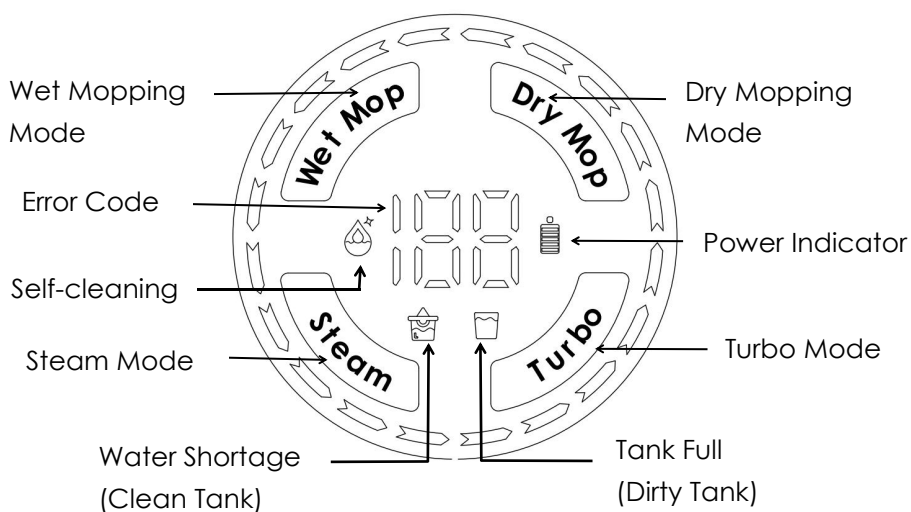

Product Introduction

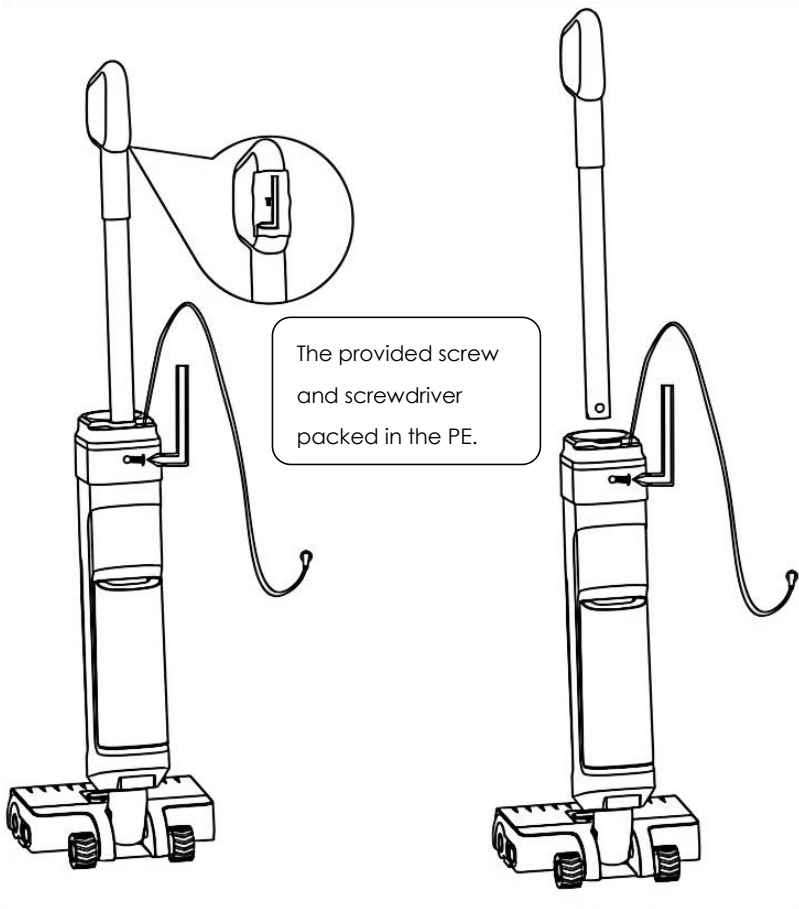

Storage Base

Display Screen

Handle Installation Instructions

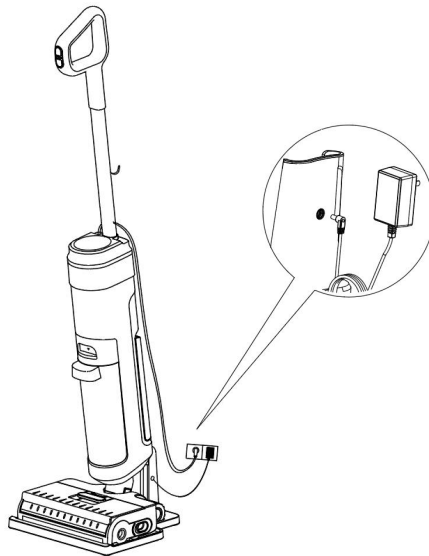

1. Insert the handle into the body of the appliance. Screw up the handle with a screwdriver. Ensure the handle is firm without any looseness.

2. If you want to unload the handle, please remove the screw on the back of the appliance, and pull the handle out.

Self-Drying the Roller Brush

1. After a self-cleaning cycle, the machine will automatically dry if left on the station (The station stays hot if the machine is removed).
2. The heating temperature will not be more than 45°C and the drying time will not be longer than 12hrs. During the drying time, the roller brush will rotate once every 45 minutes.
3. **WARM TIPS: Plug in the base first, then place the unit on it, make sure the power indicator is on.**

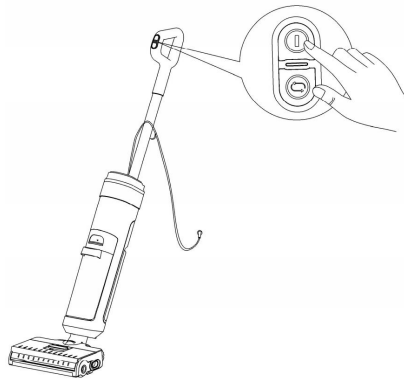

Note:

- Only the supplied adapter will be permitted to plug into the storage station.

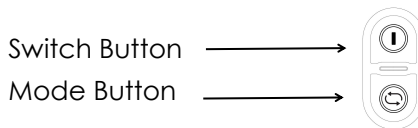

Starting to Use

Note: Please plug the appliance into the power source before use.

Hold and press the button  for 2 seconds to power the device on.
Press the button  for 1 second, the appliance will start AUTO cleaning mode. Hold and press it for 2 seconds again to power off the device.

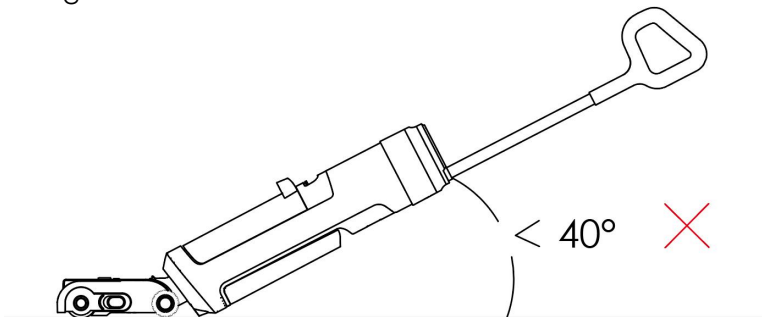

**Cleaning modes/Voice on/off:**

1. Press the mode button  for 1 second to start the cleaning as a cycle: Steam Mode--Dry Mode--Wet Mode
2. Press mode button for 2 seconds, enter Turbo Mode, press again to cancel.

3. Hold and press the switch button  and mode button  for 3 seconds to turn on or turn off the voice.

※ Do not recline the device more than 140° to avoid from water leakage.

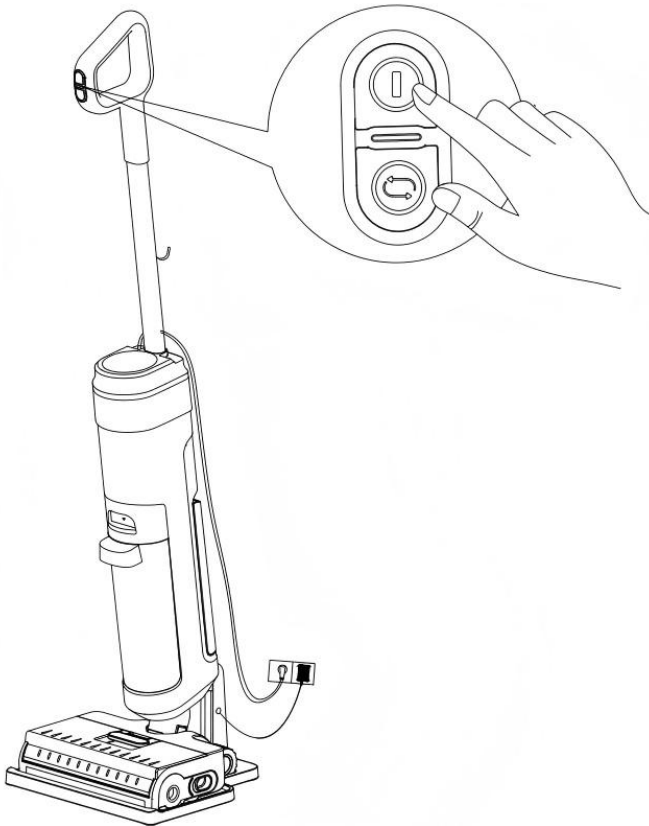

Place the device on the storage base vertically after use for self-cleaning and storage.

One Touch Self-Cleaning

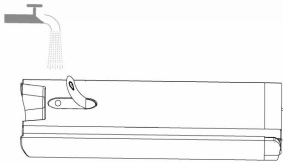

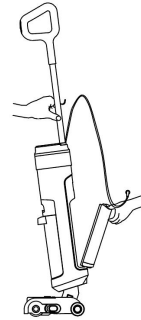

※ Only when the device and the storage base are plugged in, the self-cleaning can be started.

1. The device upright sit on the storage base and make sure the clean water tank is full.
2. Short press the  button on the handle, the self-cleaning indicator will be on, then the self-cleaning starts.
3. Please clean the dirty water tank and the HEPA after the self-cleaning is done.

Filling the Clean Water Tank

- ① Take out the clean water tank by pressing the water tank release button.

- ② Fill the clean water: Close the rubber lid firmly after adding water.

Note:

Only use water under 140F° / 60C° .

DO NOT USE HOT WATER.

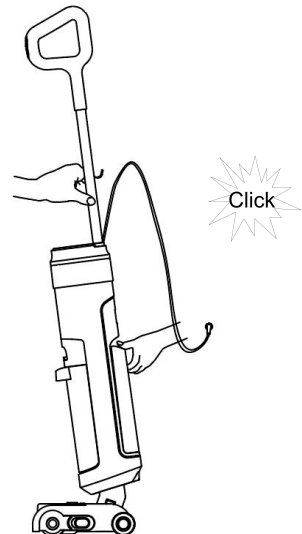

Don't beyond the water warning line.

- ③ Place the tank back to the device.

Please be sure the tank is well placed.

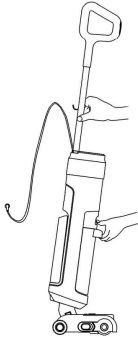

Note:

- Do not add dirty water into the clean water tank.
- Do not add any corrosive or flammable liquids or detergent into the water tank.
- It is normal if there is some water in the water tank at the first use, tests and inspections are proceeded before goods leaving factory.

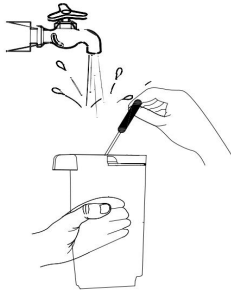

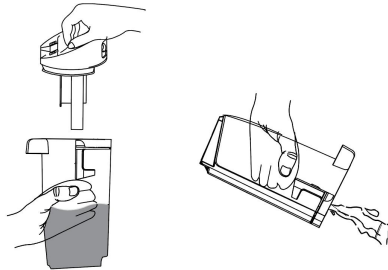

Clean the Dirty Water Tank

Note: It is recommended to empty the dirty water tank after each self-cleaning done.

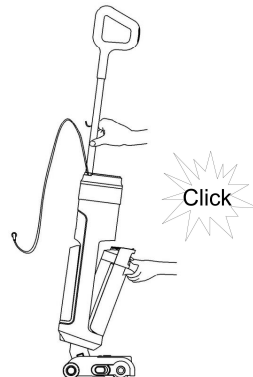

- ① Take the dirty water tank out by pressing dirty water tank release button.

- ② Hold the tank with one hand and pull up the lid with another hand to empty the dirty water. Use the **strainer** to separate the wet and dry waste.

- ③ Flush the tank and its lid with clean water. Clean the inner wall of the tank with the provided cleaning tool.

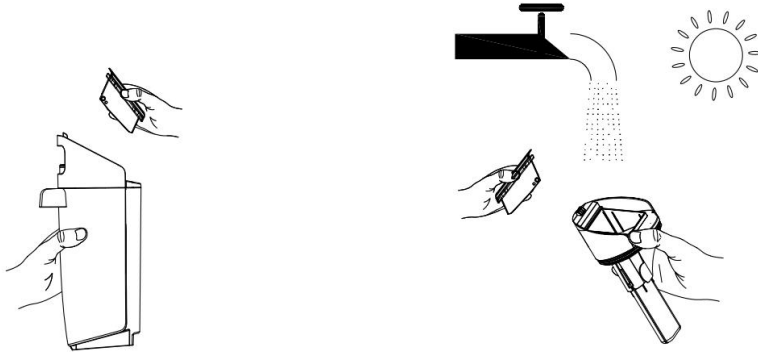

- ④ After the cleaning done, put the water tank back. Please be sure the tank is well placed.

Clean the Filter

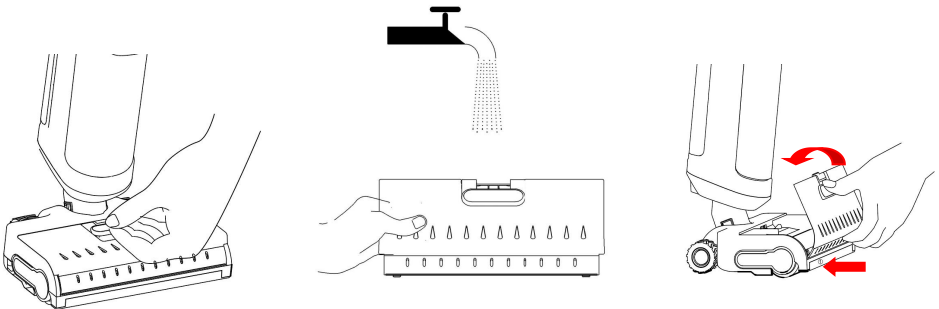

Note: It is suggested to clean the filter after each use.

Remove the filter from the top of the dirty water tank. Tap it slightly to drop off the dust on it, then flush it with clean water and cleaning tool, dry it after each use.

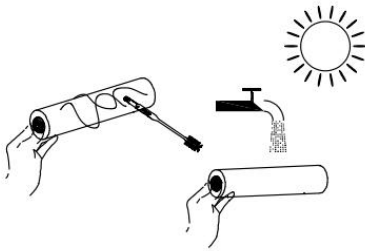

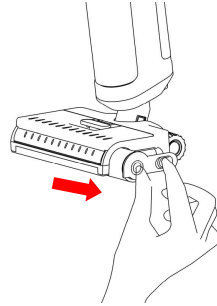

Clean the Brush Guard

1. Remove the brush guard by pressing the brush guard release button and wash it with clean water.
